

Executive Summary

COUNTRY

Croatia

DEEP DIVE VISIT

1

THEMES

Structure of the CCI
Interfaces
Clinical Research

The Comprehensive Cancer Infrastructure in Croatia will connect 13 hospitals, 4 medical schools, 2 research institutes, an umbrella patient association, and the national research funding body.

The Ministry of Health hosted a visit where participating institutions presented their scope, goals, and challenges. In collaboration with experts, a SWOT analysis was conducted to assess opportunities within the infrastructure, including interfaces and clinical trials.

Following the approval of the interim report, working groups were established, and tasks were assigned to drive implementation. Progress is now underway to meet the defined milestones.

Key Themes

The CCI4EU Deep Dive Croatia focuses on three priority themes:

Structure of the CCI

Interfaces

Clinical Research

Action Plan

A 10-month action plan was outlined, focusing on:

 Formalizing collaboration between institutions

 Structuring and ensuring interoperability of data across patient pathways

 Accrediting five leading hospitals within the network

 Reducing administrative burdens in clinical research
